JETSTREAM 350 wind machine

Jetstream 350 Wind Machine

When more air-flow is required on set, the larger diameter Jetstream 350 can provide big air with precision control over the speed and direction.

Length	390mm [15¼"]
Width	365mm [14¼"]
Height	365mm [14¼"]
Weight	13.3kg [29.3lbs]
Order Code	BW2557 (230V)
Order Code	BW2558 (117V)

Not just a fan!

When precision, pin-point control over the speed and direction of air-flow is needed, a fan simply will not do.

You need a Jetstream, Bowens industry-standard professional wind machine.

The cylindrical design of the Jetstream wind machines allow you to create a 'tube' of air which means you can point the air anywhere you need it without disturbing another part of your set – this is not possible with a regular fan.

The volume of air-flow can be varied from gentle breeze to intense bluster and beyond with control from either the on-board digital control panel or via a Gemini infra-red remote control. The remote control has eight unique IR channel settings allowing you to control Jetstreams individually or in banks to create different effects.

The Jetstream can be sited on the floor and angled to suit or mounted onto any 5/8" support stand or ceiling track system.
